Panel Fabrication

SERMAX is recognized for its top of class quality and excellent workmanship by our customers in the field of paneling work in control wiring, electrical wiring, process skid, gas analyzer tubing and ultra-high purity tubing.

We provide quality end to end service from designing, engineering, building and delivering of panels to customers' specifications.

With a floor space of 200 square meters, we can accommodate various small to medium paneling projects at any one time.

Technical Services

Process Instruments Calibration

Gas Analyzers Calibration

Gas Detectors Calibration

System Integration (PLC & HMI)

SERMAX

We offer a wide range of products suitable for small and medium sized “turnkey” projects, from initial feasibility/definition studies to maintenance and support.

We pride ourselves in providing excellent products to our customers that meets their specific needs, exceeding expectation while maintaining globally competitive pricing.

Mission Statement

- ✓ To provide products, solutions and services of the highest quality, safety, reliability and performance in order to deliver values and benefits to our customers that will earn their respect and loyalty.
- ✓ To have a work force that is customer oriented and with open minded culture based on our core values and ownership while hindering any unethical business practice, necessary to enable our business to be a winner.
- ✓ To drive our values, principles and behaviors by improving on the effectiveness and efficiencies in everything we do, to enable our company to advance in the industry that we served.
- ✓ To ensure that our employees and business partners share our successes and our shareholders will receive a sustained return on their investment.

SAFETY

To prioritize safety procedures as an organization culture not just on-site but always.

INTEGRITY

To be honest and do a quality job in exceeding customer's expectation

PARTNERSHIP

To build a long lasting business relationship with our customers and vendors, where we treat them as partners.

INDUSTRIAL PRODUCTS

SERMAX being a reputable and reliable industrial product distributor strives to add business values to the product and component supplies that we offer to our customers. The products that we represent revolve around the Gases System, Gases Handling Component & Equipment, Gases Distribution and Cryogenic Liquid Application. Majority of our customers are from the Industrial Gases, Cryogenic Application, Semiconductor & Solar, Oil & Gas and LNG sectors.

ENGINEERING & SYSTEM INTEGRATION

SERMAX services the demand for expertise in Process Automation & Process Control System, Instrumentation and Engineering. Our expertise and wide array of experiences can be put into use in almost any Process Automation & Process Control System that is common in Industrial Gases, Semiconductor, Chemical, Petrochemical, Palm Oil, Rubber Industries, Dairy Processing, Pharmaceutical, Biotech, Water, Waste Water, CMS and Power Industries.

TECHNICAL SERVICES

SERMAX offers comprehensive after sales service that includes maintenance, service, repair, verification and calibration to all the industrial products we represent and distribute. You have our commitment to provide continuous support for all your investments & valued assets.
